LEARNING

Circular Letter #11. August 10, 1934.

SUBJECT: Comparative study in the various Florida CCC Camps for the month of July, 1934.

TO: All Commanding Officers and Camp Educational Advisers of Florida CCC Camps.

FROM: P. G. Reynolds, State Educational Adviser.

Below is given a chart showing the comparative standing of the educational programs in the various CCC Camps in Florida. The comparative studies are made in regard to the total average enrolled in classes, total man hours per month, and average number of courses per company. Because your camp is not on top is no reason for thinking that you do not have the best educational program. Many of the better things you do will not show up at all on a report, but since this is the best method we have at present it will have to be used. Most of the programs are low due to the new men coming in in July. This study is based on weekly reports of the Camp Educational Advisers.
